Group Art Unit: 2872

Examiner: A. Chang

Docket No.: 107336-00008

For: STEREOSCOPIC IMAGE DISPLAY DEVICE WITHOUT GLASSES

AMENDMENT UNDER 37 C.F.R. § 1.121

Commissioner for Patents
Washington, D.C. 20231

April 24, 2002

Sir:

In reply to the Office Action mailed October 24, 2001, the period for response being extended three months from January 24, 2002 to April 24, 2002 by the attached three-month Petition for Extension of Time, please amend the above-identified application as follows.

IN THE DRAWINGS:

Please amend the drawings as indicated on the Request for Approval of Drawing Corrections attached hereto amending Figures 33 and 34.

IN THE SPECIFICATION:

Please amend the specification as follows. A copy of the marked-up version of the original paragraph is attached to this Response showing the changes made therein.

Page 1, Paragraph 1

A parallax barrier system and a lenticular lens system are well known as methods for displaying a stereoscopic image without special glasses. When these systems are used for structuring a stereoscopic image display device autostereoscopic image display device, the display device is generally structured so as to be a two-eye system because of limited
